Labeling Requirements

Pursuant to the California Health and Safety Code (Health & Saf. Code) and Title 22, California Code of Regulations (Cal. Code Regs.), Section 66262.34, each container and portable tank in which hazardous waste is accumulated must be labeled with the following information:

- Composition and physical state of the waste
- Statement or statements that call attention to the particular hazardous properties of the waste (e.g. flammable, reactive)
- Name and address of the generator
- The date upon which each period of accumulation begins (accumulation start date)
- The words "Hazardous Waste"

All labeling information must be clearly marked and visible for inspection on each accumulation unit. In some cases, containers are continuously reused for accumulation of the same waste stream; e.g., drums used to initially accumulate waste which when full are emptied into larger "collection" containers. "Recurring use" labels may be used on such containers to revise the initial accumulation date (without having to change the other labeling information). If the container is emptied at least once each day, the word "daily" may be used in the date area of the label.

The following information can be filled out while waste is stored on site, but is not required until waste is transported.

- EPA ID number
- Manifest Document number
- EPA Waste number
- CA Waste number
- D.O.T Proper shipping name and UN or NA number with prefix
